📍 Barton ACT 2600

- We are seeking a high-performing individual to join our corporate team on a fixed term contract.
- Engaging and vibrant organisational culture
- Join a team that delivers exceptional results

Web Developer/IT Support

• We are seeking a high-performing individual to join our corporate team on a fixed term contract.
• Engaging and vibrant organisational culture.
• Join a team that delivers exceptional results.

About ASPI

The Australian Strategic Policy Institute (ASPI) is an independent, non-partisan think tank that produces expert and timely advice for Australia's strategic and defence leaders. The Institute's work helps to foster strategic expertise in Australia through dialogue, research, and its contribution to public debate. In these troubled strategic times, clarity of policy thinking, and decision-making is essential. ASPI is increasingly being turned to by government, media, and the private sector as a source of informed thinking on strategic matters.

About the Role

We are looking for a talented and motivated early career web developer / IT support person to join our corporate team. The ideal candidate will have a strong understanding of web development principles and practices, as well as a passion for learning new technologies. The position will involve a mix of web development as well as general IT support work, so the ideal candidate will be required to wear both hats.

Responsibilities include:
• Develop and maintain websites using HTML, CSS, JavaScript, and other programming languages.
• Troubleshoot and resolve technical issues for users.
• Install and configure software and hardware.
• Provide training to users on how to use a range of desktop and web applications.
• Stay up-to-date on the latest web development trends and technologies.

The position works closely with internal and external stakeholders to maintain and develop business relationships. This is a busy, fast-paced, and varied role that would suit a highly organised and energetic individual.

About You Essential Qualifications:

• Diploma, associate degree or above in computer science or a related field.
• 1-2 years of experience in web development or IT support.
• Strong understanding of HTML, CSS, JavaScript, and other programming languages.
• Familiarity with Wordpress, Drupal, and other CMS platforms.
• Excellent problem-solving and debugging skills.
• Excellent communication and interpersonal skills.
• Demonstrated self-management skills including the ability to show initiative, problem solve, work independently and manage competing priorities and deadlines.
• Stay up-to-date on the latest web development trends and technologies.

Benefits:

• Competitive salary and benefits package.
• Opportunity to work on diverse and interesting projects.
• Collaborative and supportive work environment.
• Chance to make a real impact on the organisation. Remuneration will be competitive and commensurate with experience.
